

INDUSTRY 4.0

DIGITAL SERVICE

- Identify trends before they result in interruptions
- Quick and data-based problem evaluation and trouble-shooting
- Support for instant correction measures by the customer
- Process optimization due to a solid data basis (operating costs, service life, quality, safety)
- Retrofitting possible for almost all existing plants
- Flexible and individual contract design
- Cost-effective commissioning and support worldwide

CONTINUOUS PROCESS MONITORING

Its outstanding benefit is the permanent detection of alarming limit values.

The digital service at Herding is an ideal extension to the maintenance contract with annual on-site visits.

If required, we also offer the digital service without an annual on-site visit. If necessary, on-site visits will be agreed with you individually.
