PURE SURFACE FILTRATION

THE ORIGINAL
BY HERDING

made in germany

BENEFITS

HERDING FILTER TECHNOLOGY

The Herding® filter technology bases on pure surface filtration. It sustainably protects man and machine from harmful production emissions and enables absolutely sort- and contamination-free material recovery. This increases directly your productivity.

Lowest clean gas values, absolutely constant operating conditions, highest availability and energy efficiency are key features of the innovative technology. Herding® filter elements show extreme durability and, depending on the process, long service life times of more than 15 years. Thereby the filters make a valuable contribution to environmental protection and sustainability.

Herding® filter elements have proven themselves for decades in effective and safe particle separation in almost all areas of industry . Even with finest grain sizes, energy-efficient air recirculation is possible in most cases, proven even with toxic dust. Numerous applications can be covered in a temperature range of up to 450 °C.

**DURABLE
LONG SERVICE LIFE**

**CONSTANT
OPERATING CONDITIONS**

**ENERGY EFFICIENCY DUE TO
LOW CLEANING PRESSURE**

**PURE AIR AND CLEAN GAS
DUE TO LOWEST CLEAN GAS VALUES**

**COMPACT
DESIGN**

**PRODUCT RECOVERY
WITHOUT CONTAMINATION**

**RESISTANT
TO CHEMICALS**

HERDING FILTER TECHNOLOGY WITH PURE SURFACE FILTRATION

DESIGN

FILTER MATRIX

Compact rigid body

Herding DELTA, PRO, HSL

Sintered PE (polyethylene)

Herding BETA

Sintered PPS

(polyphenylene sulfide)

Herding ALPHA

Clay with ceramic binder

EFFECTIVE PRODUCT SEPARATION

The particle spectrum to be filtered is separated on the surface.

No affinity to store fine particles in the filter body.

SURFACE COATING

Microporous layer, homogeneously embedded in the filter surface

INSTALLATION

DIRECTION OF INSTALLATION

Depending on the individual application and process requirements horizontal or vertical installation is possible.

1 CLEAN GAS-SIDE INSTALLATION

Clean gas-side installation enables optimal and clean access to the filter elements and provides highest possible protection for the personnel.

2 RAW GAS-SIDE INSTALLATION

The installation of the filter elements from the raw gas side usually allows a direct and optimal revision of the raw gas area. No additional height is required for the installation.

HERDING FILTERTECHNIK - PURE PRODUCTIVITY

Sustainability „made in Germany“

From the single filter element to the completely installed filter system, the production chain starts with the filter media production and ends with the final assembly.

The vertical range of manufacture in Germany ensures an extremely high quality standard and the greatest possible flexibility for our customers worldwide. Based on a well planned modular principle, a variety of filter system types is available, which can be individually tailored to the required application. A wide range of housing and construction materials rounds off the range of product variations.

Herding **MAXX**

For very high air flows

Herding **RESIST**

For applications with high requirements on pressure resistance and easy cleanability

Herding **PROCESS**

The series for highest expectations

Herding **FLEX**

The flexible type series for all industries

Herding **COMP**

The compact filter system for limited space
